

Unified® Screening & Crushing

Need Wear Parts? Unified has them!

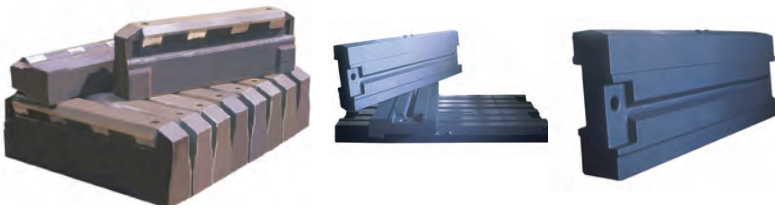

Our huge inventory is ready for immediate shipment.

Unified wear parts meet OEM specifications and can be engineered to meet a unique application to:

- Crush highly-abrasive material
- Handle oversize material
- Reduce circulation
- Increase wear life
- Lower operating costs

Alloys:

- Standard MN: 13-14.5%
- 18% MN: 18-19.5%
- 21% MN: 21-23%

Wear parts can be customized!

More than 10,000 patterns available in 14%, 18% and 21%. Torch rings, mantle caps, and cheek plates.

We can re-design wear parts. Need to increase thickness and a special tooth design? Customization can give you longer wear life and fewer change outs.

Guaranteed Fit

If we don't have it in stock, our crusher parts experts will visit on site to design or engineer a product specific to your needs.

Count on Unified to customize a solution to maximize first-pass yield.

Floating Feed Cone Liners & Hoppers

- Main Frame Liners
- Feed Plates

Benefits

- Protects OEM product
- Lowers noise
- Easy replacement

FLOWBACK - Non-hazardous

Protect backing liners and wear parts on almost any crusher industrial crusher equipment. Easy mixing and standard application, helps to eliminate gaps that can weaken parts and shorten wear life. Safe for you and the environment.
